www.dvauction.com

Online Auction ONLY

HOWDY FROM THE FORSTERS

FR

We are proud to celebrate our Annual Production Sale with you. We have been providing the industry with reputable genetics for 57 years. I would like to give an extended thank you to all our friends/customers, and family who make this possible for us.

This is our second year doing an Online Auction Only Sale. We are very excited about it. Last year we had great success doing this format, and had a lot of compliments from buyers about it. It's going to go through DVAuction. You will need to register prior to bidding at www.dvauction.com. The bulls will be available for viewing in their pens from February 13-18, 2024 at the Forster Ranch. If you are unable to make it in this time frame, you are more than welcome to stop by the ranch at any time to view them. Bidding will open on Tuesday, February 13th at 8:00 am MT and will close Sunday, February 18th at 4:00 pm MT. Extended bidding will start at 4:00 pm MT or 5 minutes prior. This means if there is a bid at 3:55 pm MT, bidding will stay open on ALL lots for another 5 minutes. This will continue until no more bids are being placed. There must be a 5-minute period with no bids before bidding closes. We are happy to take bids for individuals that are not able to do so on their own or need help with the bidding process.

These bulls were born in late spring of 2022 and weaned in November with no creep. They are put on a high roughage diet until spring. The calves are then turned out to pasture like summer yearlings. Prior to the sale we will supplement them some to get ready for sale day. Our bulls are grown out and NOT finished out. Forster Red Angus believes this will ensure a better breeding bull that will have less maintenance and breed more cows for a longer servicing career. We have a lot of customers that continue to compliment us on how well our bulls stand up and how long they last.

If any of you need help in your selection, feel free to let us know and we will be more than willing to help you out in any way we can. You are also more than welcome to stop by the ranch and view our cattle at any time.

We look forward to seeing you at the sale!

Sincerely,
Ken Forster & Family

Back Row: Tate holding Mav, Libby, Kenny, Jaylea, Seth, Jack, Kaitlyn holding Vann, Clint, Donny, Zane, Melissa. Front Row: Dak, Anastasia, Adriana, Carter.

“OUR CATTLE ARE A PART OF WHO WE ARE, NOT JUST WHAT WE DO.”

➔ GENERAL INFORMATION ➔

ABBREVIATIONS AND EXPLANATION OF TERMS

C.Ease-Calving Ease Code: Calving ease continues to be a concern for those breeding heifers. WE have tried to provide as much information as possible with EPD's, actual birth weights and a star code system. The star rating for each bull is based on the best information we have available on both individuals and their close relatives. Remember to take into consideration your own cow herd genetics, environment, feeding conditions, etc., will have a big influence on your birth weights.

* **Use on cows**

** **Use on cows or growthy heifers**

*** **Few calving problems should occur when bred to first calf heifers**

HB: The probability of developing profitable cowherd traits while maximizing the value of marketed progeny.

GM: The probability to increase the value of marketed calves.

Act. BW: The animal's actual birth weight.

BW Ratio: The ratio of an animals BW to the others in its birth contemporary group, 100 being average.

Adj. WW: Weaning weight adjusted 205 days.

WW Ratio: The ratio of an animals AWW to the others in its weaning contemporary group, 100 being average.

YW Ratio: The ratio of an animals AYW to the others in its yearling contemporary group, 100 being average.

ADG Ratio: Is the gain from WW to YW and compared to others in their yearling contemporary group, 100 being average.

SC: Actual bull's scrotal measurement in centimeters.

Ultra Sound Carcass: Scan data taking as yearlings for IMF:R, RIB:R, and Back Fat.

% IMF:R: Is the marbling ratio, compared to others in their yearling contemporary group, 100 being average.

REA:R: Is the ribeye ratio compared to others in their yearling contemporary group, 100 being average.

FAT:R: Is the back fat ratio compared to others in their yearling contemporary group, 100 being average.

MPPA: Based on Dam's past productivity. For example, a cow's MPPA for weaning ratio is calculated from the cow's average progeny weaning ratio, the number of her progeny with weaning record, and the repeatability of weaning weight.

TERMS AND CONDITIONS

Terms: Cash and settlement must be made immediately after the sale.

Disputes: The auctioneer will settle any disputes as to bids and his decision on such matters shall be final.

Handling: As sale is affected, all animals will be maintained at the purchaser's risk.

Announcements: Any of these made sale day take precedence over printed material.

Semen Interest Retained: This means purchaser buys the bull for what he bids and gets 100% possession and 100% resale value of the bull when he decides to sell him. It does give Forster Red Angus the option to collect, use and market semen from the bull and does not restrict purchaser from doing the same. The revenue from semen sales will be shared by the parties with semen interest after the cost of collecting and marketing of such semen. This collection, unless agreed to otherwise, would be done at the expense of Forster Red Angus and the purchaser's convenience.

Seller's Semen Rights: A 1/2 (one half) semen interest will be retained in all bulls by seller. In the event if seller elects to collect semen from a designated bull, it will be done at seller's expense during such time when purchaser is not using the bull for breeding. On all bulls the buyer receives full possession and full salvage value.

FERTILITY TEST: These bulls are guaranteed breeders. They have all passed a breeding soundness evaluation, including a semen test by a certified veterinarian.

Dam's Age: The dam's age at the time of calving.

CED: The calving ease direct EPD is the probability that an animals calves will calve unassisted to a two year old dam.

BW: The birth weight EPD is measured in pounds of weight differences at birth.

WW: The weaning weight EPD is measured in pounds of weight difference at a 205 day weaning age.

YW: The yearling weight EPD is measured in pounds of weight difference at 365 days of age.

Milk: The milk EPD is the weight difference at 205 days which can be attributed to the milk production and female characteristics of the daughters of the animals.

TM: The total maternal EPD is the total weight difference at 205 days which can be attributed to the dam of an animal alone.

ME: Mature Cow Maintenance Energy Requirement- Predicts cows who have lower energy requirements and will eat less than cows with higher requirements at the same level of production. Low numbers are desirable.

HPG: The heifer pregnancy EPD measures the percent probability that an animal's daughters will calve, as a two year old.

CEM: The maternal calving ease EPD is the probability that an animal's daughters will calve unassisted as two-year olds.

STAY: The stayability EPD is the probability that, after an animal's daughters enter the cowherd, they will remain productive until at least six years old.

MARB: The flecks of intramuscular fat (marbling) is the rib eye muscle between the 12th and 13th rib. Marbling is the most important factor in determining quality grade and is associated with product palatability.

REA: The rib-eye EPD is the difference in square inches in the size of the longissimus muscle (the ribeye muscle, as measured at the 12/13 rib) of an animal's progeny. It is a component in the calculation of carcass cutability or yield grade of percent retail beef.

BFAT: The backfat EPD is the difference in inches in exterior fat thickness in the progeny of the animal. In carcasses, it is measured at the 12/13 rib for ultrasound measurements. It is the most important component in the determination of cutability or yield grade of percent retail beef. It also represents fat which may need to be trimmed off.

Guarantee: Bulls are guaranteed breeders. All claims must be submitted in writing to the seller with seven months of sale date, along with semen evaluation and health report, at buyer's expense, from a certified veterinarian. Seller shall have the privilege of trying the bulls after his return before making an adjustment. This guarantee is void if there is evidence of improper management in caring for the animal, or the bull's inability to breed is due to sickness or injury which was incurred after being sold. Heifers are guaranteed to be open and are Bangs vaccinated.

Health Certificates: Will be furnished anywhere in the U.S.A.

Liabilities: All people who attend the sale do so at their own risk and the owner and sale management assume no liability, legal or otherwise, for any accidents which may occur.

Contracts: The above terms and guarantees shall constitute a contract between the buyer and seller of each animal sold.

Default: In the event the Buyer defaults on payment, the Buyer shall be responsible for all costs, including attorney's costs, incurred by Sale Management or Seller in connection with collecting, or attempting to collect, payment due.

Delivery: Free delivery on bulls immediately following the sale to central sale barn locations in North Dakota and adjacent states. Beyond that, delivery at cost only. Forster will help arrange for shared trailer loads to central locations and prorate the loads at cost. We try to arrange deliveries to accommodate as many buyers as possible, but it is impossible to schedule perfectly. Please try to understand. Forster normally will deliver most cattle.

HOW DOES DVAUCTION, ONLINE AUCTION WORK?

This means that bidders will be able to preview the lots online with complete information, including Pedigree, EPDs, and video, for several days prior to the sale. During that time, bidders can leave a maximum bid, which the system will represent confidentially up to that amount. Bidders can also bid incrementally, as the bid advances prior to the close.

**All lots for this event will close at the same time. If a bid is placed within 5 minutes of the closing time, closing times for that event will be extended 5 minutes for all lots after that bid. This continues until no bids are placed for 5 minutes.*

For general questions to set up account please contact DVAuctions office at: 402-316-5460 or support@dvauction.com

**HIGH SPEED INTERNET ACCESS REQUIRED

REASONS TO BUY FROM ONLINE AUCTION

- 1 Shop at YOUR Convenience**
- 2 NO Pressure** – View bulls, go home, and decide what to bid on
- 3 View Bulls at Forster Ranch** on YOUR time from February 13-18, 2024
- 4 Easy Access** to Forster Ranch
- 5 Weather is LESS Concerning** – 6 days to view bulls & bid
- 6 Watch & Bid Online for FREE** on www.dvauction.com

Bid from home with DV Auction's "real-time" internet bidding service!

Buying online is as easy as 1, 2, 3...

1. Create an account at www.dvauction.com under the "register" tab and watch our online bidding tutorial
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction-a DV representative will notify you once you have been approved
3. Tune in for the sale and make you purchases!

After the sale, contact the sale manager or owner to arrange transportation and payment. **High speed internet** is required for successful bidding-be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy Bidding-if you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

Having troubles? Call Tami at (308) 870-3661 or email tami@dvauction.com
Our full-time support team can also always be reached at (402) 474-5557.

Forster History G025 is long spined, has a wide top, deep body, thick muscled, and lots of volume. He is very easy keeping. Excellent disposition. His calves are consistently stamped by his phenotype. His pedigree is stacked top and bottom genetically to produce what he is, which he has proven. He throws moderate BW, heavy WW, gainability, carcass, and easy fleshing cattle.

Forster Riley E123 is a stylish, very long bodied heifer bull who offers a punch. He has excellent feet. Sired by Forster Heater 517, who also sired long bodied, free moving cattle with excellent feet. He had many sale toppers for us. The dam, Forster Copperqueen C104, sired by Cody U659 and the Copperqueen lineage make for excellent herd builders.

Shag Maxing 945 is a long bodied, smooth made, clean fronted bull. He is an ET bull we bought to use on heifers.

“OUR CATTLE ARE A PART OF WHO WE ARE, NOT JUST WHAT WE DO.”

PARAMOUNT

Now is a paramount time to verify your genetics in the Feeder Calf Certification Program. The Red Angus Live Animal Specification, recognized by the USDA, acknowledges **Red Angus are genetically Angus and meet requirements to be included in many Angus branded-beef programs.**

**Genetics, not hide color,
qualify an animal as Angus.**

Visit RedAngus.org

RED ANGUS
RANCH TESTED. RANCHER TRUSTED.

Congratulations on your bull purchase!

Welcome to the Red Angus family. If this is your first purchase of Red Angus genetics, we hope you find the addition to your breeding program a move in a positive direction. Research has shown that Red Angus-sired calves are more in demand than ever before! Steers – and maybe more importantly their heifer mates – continue to be sought after in the marketplace with buyers willing to pay a premium for these genetics.

If you are a repeat customer, we appreciate your dedication and are pleased that the cattle are making a profitable difference in your breeding program.

The Feeder Calf Certification Program (FCCP) is the cornerstone of the Red Angus Association of America's marketing programs. At the core of the FCCP is genetic verification with the ability to provide age and source information. Enrollment in our FCCP program clearly tells the world that the calf is a minimum of 50% Red Angus, and thus could be identified for extra premiums on sale day. Who doesn't want more money?

Ready to sign up? The process is simple and affordable, with no enrollment fee and only the cost of the tag option you select. See the back of this flyer for details and steps to enroll.

Enroll your calves today in FCCP!

Transfer every bull.

Your seedstock supplier should transfer every bull you purchase into your RAAA herd inventory. This is a key step because the FCCP is based on the use of registered Red Angus bulls. Visit with your genetic suppliers to confirm they transfer your new bulls into your operation's name.

Did you purchase Red Angus semen?

An invoice detailing that purchase will be necessary to complete a tag purchase. Make sure you keep a copy of this information to submit to the value-added department when enrolling.

Did you buy heifers bred to a Red Angus bull?

Calves out of commercial heifers bred to registered Red Angus bulls also qualify for the FCCP program, but ONLY if the seller completes the

purchased bred commercial female form. This form is the key component in enrolling the resulting calves into the FCCP. Ask your supplier to assist with this form, which is available on RedAngus.org.

Ready to purchase FCCP tags?

To order tags for your upcoming calf crop, the process is simple, but does require contacting the value-added department. After answering a few questions regarding your management practices and genetics, an FCCP tag order will be placed on your behalf. It is imperative that the calves be tagged at the ranch of origin. The FCCP program has been a widely used third-party verified program for more than 25 years. We are excited to assist you on boosting your return on investment with Red Angus genetics.

Feeder Calf Certification Program & Allied Access Enrollment Checklist

Red Angus Marketing Programs have been delivering results for nearly two decades, combining the value of superior genetics with access to export markets and premium product lines, while allowing Red Angus customers to build strong reputations.

The Feeder Calf Certification Program (FCCP) was the industry's original USDA Process Verified Genetic, Source and Age Verification program.

Allied Access (AA) provides solutions for crossbreeding programs by delivering source & age verification, without the genetic restriction. AA delivers the flexibility for Red Angus customers using multi-breed rotations, hybrids or composites to capture heterosis.

Feeder Calf Certification Program

- Traceability to at least 50% Red Angus bloodlines
- Source verified to ranch of origin
- Group age verified

processverified.usda.gov

Allied Access

- Source verified to ranch of origin
- Group age verified

processverified.usda.gov

- Make the call.**
Contact RAAA and answer a few simple questions. The evaluation takes approximately 15 minutes and there is NO ENROLLMENT FEE.
- Provide special documentation** (only when needed).
For AI-sired calves, provide receipts of semen purchases/collections. In the case of purchased bred females, a signed invoice/bill of sale stating the number of head & breeding status (including service sires).
- Purchase tags.**
Upon completing the evaluation, tamper-proof tags will be shipped to the ranch – visual (dangle) tags, EID-only buttons or a correlating combination visual tag w/ button & RFID. Customers have the option to add management numbers or a line of text to the tag.
- Tag calves.**
Tag calves at anytime – birth, branding, preconditioning, weaning – but they must be tagged before they leave the ranch of origin. Leftover ear tags can be used on the next enrolled calf crop.
- Fill out Enrollment Agreement.**
After calves are tagged, return the Enrollment Agreement along with a copy of the first page of your calving record to RAAA. The Enrollment Agreement is mailed when the tags are shipped to the ranch and is available online at: RedAngus.org/marketing.
- Receive Certificate of Compliance.**
RAAA mails a COC after the Enrollment Agreement and first page of your calving record have been processed. Additional copies of COCs can be sent to buyers, feedyards, livestock markets, etc. All COCs are available online at RedAngus.org via the ASV Tag Search tab.
- Call to enroll each calf crop.**

Enroll in the Feeder Calf Certification Program
and order your tags today!

RED ANGUS
RANCH TESTED. RANCHER TRUSTED.

Value Added Department
940-477-4593
tags@redangus.org

A new arrangement between the Red Angus Association of America and IMI Global, a division of Where Food Comes From, Inc., will allow cattle producers who take advantage of Red Angus value-added programs to more easily utilize IMI Global verification services. Cattle producers who enroll in Red Angus value-added programs will now have the capability to start the application process for IMI Global claims on the same phone call, saving valuable time and streamlining the enrollment process. Because the FCCP is already providing verification for age, source and genetics, producers who enroll calves in the program can use the same program-compliant EID as the identifier for Red Angus and IMI Global programs.
